<u>Java 8:</u>

Three Main Features of Java 8:
1. Functional Programming
2. Lambda Expression
3. Stream API

We can define Methods in Interface.

Functional Programming:
Now instead of focusing on the Object we would focus on the behavior of the Object[Function/Method]
Types of programming:
- Imperative Programming: We specify what to do it and how to do it
- Declarative Programming: We specify what to do it

Lambda Expression:
We focus on the main code and not on the entire code.

Stream API:

Interface In Java 8
